

LaneWorkSafe ENVIRONMENTAL POLICY STATEMENT

MISSION

LaneWorkSafe is committed to completing its business with regard to identifying the importance of respect for the environment and its protection and sustainability at all times.

VISION

By continuing to develop and introduce methods that encourage an environmentally friendly culture at LaneWorkSafe by our staff.

ACCOUNTABILITY

Stephen Lane, the Managing Director is ultimately accountable for environmental protection issues and directs and guides the principles and ethos for implementing policies and procedures that better demonstrate LaneWorkSafe are serious about environmental issues.

LaneWorkSafe is committed to reducing the environmental impact on all the issues associated with our general business overall. With attention to the following :

- Continued compliance with all applicable laws, regulations and statutory obligations relating to environmental issues
- Continually seeking to improve our environmental sustainability
- Respecting and managing environmental issues associated with any client requirements to achieve better outcomes
- Increased awareness and attention to reducing environmental hazards which may pose risks to the community, environmental or property
- By vigilantly identifying, investigating and resolving all environmental incidents and non-conformance matters
- Undertaking our day to day operation by continually seeking to reduce our affects on the environment
- Better considering the environment in seeking suitable outcomes regarding the manner in which we source and procure products
- Using efficient and effective waste management procedures to help reduce our impact on already scarce landfill resources

By demonstrating our willingness to leave minimal footprint on the environment in all our commercial endeavours LaneWorkSafe strive to set an example for other corporate identities and individuals that can easily be followed.

Interested parties are welcome to inquire as to initiatives undertaken by LaneWorkSafe in an effort to preserve the environment for current and future generations.
